

ExO Economy

30-Doubling Challenge

Terms and Conditions

Disclaimer: This is an experiment in participatory exponential doublings to demonstrate how simple engagement shifts in behavior can grow beyond linear patterns. We have considered a fair and equitable set of rules that serve as a win-win to all parties with a few parameters to encourage diversity in engagements. In no way is this exchange meant to be associated with Fiat or any terms that might be associated with securities regulation. We will start each candidate with 0.00002 tokens on Day zero. For every doubling task measured and approved, the allocation increases by 2x. The maximum reward is capped at 10,737.42 EXOS for a 30X doubling. Upload your proof here: https://economy.openexo.com/third_birthday/
