

# New Project

on the leaderboard.

Speaker 1: You'll be able to see over on the left, where everybody else stands. So these are testing in this beginning phase, you're going to be starting to see yourself as populating over here. In this case, the XO angel has completed all of these tasks. So this, if this is you, then you'll get to see exactly what you've done. You know, where you stand, where you need to go back to and on the leaderboard or on the challenges

you'll actually see over here that it's complete under your profile. So if it's not complete, then you know, you can still do it. So here's one that says new. That means I can still submit as XO angel, a hundred, this particular board,

**Orange**  
100EXP-249EXP

**Purple**  
250EXP-499EXP

## New Project

the levels of experience are probably the most compelling in a game. And this is what will lead your behavior in achieving different levels. So you get to the novice phase, it's just kind of half of a Griffin.

Speaker 1: That's one experience points up to 99 experience points. This is how much you're engaging within the community. You'll get to an orange level. You'll see that around your profile picture. You'll see that orange ring. If you get to purple, you'll see the purple, bronze, silver, et cetera, and all the way to diamond. This is going to be the hardest one to achieve. And I challenge any of you to try to get to this level. Hopefully that's helpful. It helps you get to the second level of this game. We have instructions that can be found on the website.

**Terms & Conditions**

**First 100 players to earn 30-Doublings receive 10.737 EXOS tokens**

**Any player earns bonus tokens for level play from Novice to Diamond**

**New challenges added each week eligible submissions 6/2021 thru 5/2022**

<https://economy.openexo.com/30-doubling-challenge-2022/>

Top prizes are paid out to the first 100 people to reach 30 doublings. That's the ultimate goal bonus points will be added. Experience points, lead to bonus points, lead to added value. And w that's a wait and see. So hopefully that's intriguing enough to keep you going check on your levels.

Speaker 1: Levels are really where it's at. 30 doublings is the base minimum requirement to achieve the goal of over 10,000 tokens as a payout. And that's the whole purpose of doing a 30 Dublin challenge leading to the knowledge

of how to get to an exponential curve. Really understanding that 30 behaviors can get you to massive transformation, massive growth. And in that way, it walks you through the possibility to this, to an organizational level, to a personal level, whatever your day is, you're achieving in life, whatever your purpose, your goal, your massive transformative purpose is to get to an exponential scaling ability. It's 30 behaviors, that's it. And this is what we're demonstrating with this game. Hopefully it's fun for you.

# New Project

And we have some bonuses along the way, help us help us learn. We absolutely love your feedback and welcome to the 30 doubling challenge. 2022.

The image is a composite graphic. In the center, a woman with long dark hair, wearing a red t-shirt, is shown from the chest up, looking upwards and to the right with a thoughtful expression, her hand resting on her chin. To her right is a smartphone displaying the 'exoconomy' app interface. The app shows a user profile for 'AMY', a 'Sign-up to ExO Insights' notification, and a 'Challenges' section with 'Marketplace Engagement' marked as 'Complete'. Below this, there are three challenge levels: 'Novice' (0EXP), 'Orange' (100EXP), and 'Purple' (250EXP). The app's bottom navigation bar includes icons for 'Users', 'Challenges', 'Leaderboard', 'Levels', and 'Admin'. To the left of the woman is a promotional graphic for the '30 DOUBLING CHALLENGE'. It features a blue and purple background with fireworks and a circular logo with two thumbs up. The text reads 'I REACHED 30 DOUBLINGS' and 'So I received 10 737 EXOS'. Below this, it says 'You can too by heading over to the Doubling Challenge in the link below' with a right-pointing arrow. At the bottom of the graphic are the logos for 'exoangels' and 'exoconomy'. Below the promotional graphic is a line graph titled '30-Doublings'. The y-axis is labeled 'Your EXOS' and ranges from 0 to 12,500. The x-axis is labeled 'Number of Doublings' and ranges from 1 to 30. The graph shows a curve that starts near zero and rises exponentially, reaching approximately 10,737 EXOS at the 30th doubling.
